

GenAI Roadmap Prioritization Workshop

We start with AI ideas.
 You leave with a prioritized roadmap and a clear path to build.
4 dedicated hours. No cost. No risk. No catch.

- 30+ AWS Certifications**
- 100+ Projects Delivered**
- 40+ Cloud, AI & Product Consultants**
- Specialization: GenAI, ML & Cloud Engineering**

US | UK | Hungary

Why us

Founders Ourselves

We've launched, scaled, and exited products. We understand the tradeoffs: speed vs. stability, experimentation vs. cost.

End-to-end ownership

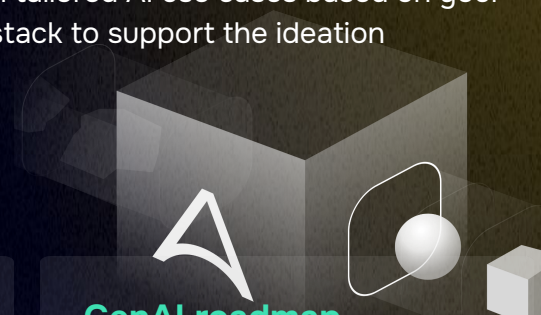

Frontend, backend, data, infrastructure, AI, designed as one system. We own the full AWS stack so nothing falls between the cracks.

GenAI + AWS specialists

Advanced Partner with deep delivery experience. Certifications across Solution Architects, AI and Cloud Engineers, aligned to AWS best practices.

We come prepared

We arrive with tailored AI use cases based on your industry and stack to support the ideation process.

What you get

Tailored use cases

We bring ideas, you bring context. Together we identify what's worth building.

Technical validation

Feasibility, data readiness, and AWS fit assessed before any commitment.

GenAI roadmap

A prioritized, scoped roadmap ready to move straight into delivery.

Workshop

Context

Align on objectives, scope, and expected outcomes

Technical review

Map your stack, data, and integration readiness

Scoping

Select and scope the use case best suited for AWS funding

Business discovery

Understand your vision, priorities, and where AI can accelerate your business

Use case identification

Surface your highest-potential GenAI opportunities

Next steps

Confirm decisions, owners, and the path to delivery
