

# Technical Roadmap Prioritization Workshop

We start with your cloud backlog.  
 You leave with a prioritized roadmap and a funded path to build.  
**2-4 hours with our Solution Architects. No cost. No risk. No catch.**

- 30+ AWS Certifications**
- 100+ Projects Delivered**
- 40+ Cloud, AI & Product Consultants**
- Specialization: GenAI, ML & Cloud Engineering**

US | UK | Hungary

## Why us

### Founders Ourselves

We've launched, scaled, and exited products. We understand the tradeoffs: speed vs. stability, experimentation vs. cost.

### End-to-end ownership

Frontend, backend, data, infrastructure, AI, designed as one system. We own the full AWS stack so nothing falls between the cracks.

### Cloud + AWS specialists

Advanced Partner with deep delivery experience. Certifications across Solution Architects, AI and Cloud Engineers, aligned to AWS best practices.

### We come prepared

Our Solution Architects arrive with a tailored view of your cloud landscape, based on your industry, stack, and current initiatives.

## What you get

### Agreed priorities

Clarity on what to build, what to defer, and what to cut, agreed across your team.

### Architecture & scope

Technical approach, in/out scope, and success criteria defined.

### AWS funding surfaced

Applicable AWS programs identified and built into your next steps.

## Workshop

### Context

Align on objectives, scope, and expected outcomes

### Technical review

Map your stack, data, constraints, and AWS footprint

### Scoping

Agree on scope, timelines, and measurable outcomes

### Business deep dive

Understand the use case, current process, and success definition

### Solution architecture

Define the technical approach and AWS service selection

### Next steps

Action items, timeline, and AWS funding opportunities
